MAGNETIC NASAL BREATHING

VSL 1 — THE FIRST BREATH TEST

ANGLE Sleep / nighttime nasal breathing comfort

AUDIENCE Adults experiencing nasal restriction at bedtime

FORMAT Athlete/creator-led UGC; 9:16; Meta Reels / Feed

01 — HOOK | 0:00–0:25

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
"If you struggle to breathe through your nose at night, I want you to try something." "Put two fingers right here, on the sides of your nose." "Now gently pull outward." "And take a breath." "Feel a difference?" "If you do, there's a reason for that." "And it might explain why breathing through your nose feels so frustrating when you're trying to sleep."	**VISUAL / SHOT DIRECTION** Tight face close-up. Creator demonstrates gently pulling sides of nose outward. Natural light. **ON-SCREEN TEXT** TRY THIS 5-SECOND BREATHING TEST. **PRODUCTION / PROOF NOTES** Demonstration is not diagnostic and does not predict product response.

02 — PROBLEM | 0:25–0:55

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
"You know that feeling?" "You finally get into bed after a long day." "You're tired." "You just want to close your eyes and fall asleep." "But the moment you settle down, breathing through your nose doesn't feel as easy as it should." "So you open your mouth." "You change positions." "You try breathing through your nose again." "And suddenly, something you shouldn't even have to think about becomes the most annoying part of your bedtime routine."	**VISUAL / SHOT DIRECTION** Creator turns in bed, opens mouth to breathe, glances at bedside clock. **ON-SCREEN TEXT** WHEN BREATHING BECOMES THE DISTRACTION.

03 — AGITATION | 0:55–1:30

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“And sometimes, it doesn’t stop there.” “You wake up in the middle of the night with your mouth feeling completely dry.” “You reach for water.” “You check the time.” “And now you’re lying there, trying to get comfortable all over again.” “Maybe you’ve tried changing sleeping positions.” “Maybe you’ve tried regular nasal strips.” “Or maybe you’ve just accepted that breathing through your mouth is part of your nighttime routine.” “But think about it.” “After everything you’ve dealt with during the day, shouldn’t bedtime be the one moment when you can finally relax?” “Instead, you’re lying there thinking about something as basic as breathing.” “And that’s exhausting.”	**VISUAL / SHOT DIRECTION** Night: dry mouth, water, clock. Morning: alarm and tired expression. **ON-SCREEN TEXT** YOU DESERVE A MORE COMFORTABLE NIGHT. **PRODUCTION / PROOF NOTES** Avoid suggesting the device treats the cause of nighttime awakenings or dry mouth.

04 — MECHANISM | 1:30–2:05

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“Here’s something most people don’t realize.” “The narrowest part of your nasal airway is an area called the nasal valve.” “For some people, that area can narrow even more when they breathe in, making nasal breathing feel restricted.” “Now remember that little test we did at the beginning?” “When you gently pulled the sides of your nose outward?” “That’s the basic idea behind external nasal dilation.” “And that’s exactly what [BRAND NAME] is designed to do.” “It uses two adhesive tabs and a reusable magnetic band.”	**VISUAL / SHOT DIRECTION** Accurate nasal-valve illustration, tabs and band macro footage, outward support visible. **ON-SCREEN TEXT** SUPPORT THE NASAL VALVE. FEEL THE DIFFERENCE.

“When the band connects to the tabs, it gently pulls outward, helping support the sides of your nose.” “No medication.” “Nothing inside your nostrils.” “Just a simple mechanical way to help keep that narrow area more open while you’re wearing it.”	

05 — SOLUTION / PRODUCT EXPERIENCE | 2:05–2:50

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“Now let me show you how simple it is.” “First, clean and dry the sides of your nose.” “Apply the two adhesive tabs.” “Then bring the magnetic band toward your nose.” “And just like that, it connects.” “The band gently lifts outward through the tabs, helping support the nasal valve.” “Nothing goes inside your nose.” “And the magnetic band itself is reusable.” “You just replace the adhesive tabs when needed.” “Now imagine making this part of your bedtime routine.” “Brush your teeth.” “Wash your face.” “Put on your nasal band.” “And settle into bed feeling more comfortable breathing through your nose.” “No complicated routine.” “Just a simple little device designed to make nasal breathing feel easier.”	**VISUAL / SHOT DIRECTION** Unedited application: clean dry skin, attach two tabs, connect band, genuine first breath, bedtime routine. **ON-SCREEN TEXT** APPLY → CONNECT → BREATHE. **PRODUCTION / PROOF NOTES** Capture a genuine reaction; do not script a false before/after.

06 — PROOF / OBJECTIONS | 2:50–3:40

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“Now, I know what you’re probably thinking.” “Okay, but does it actually work?” “And that’s a fair question.” “Because if you’ve already tried regular nasal strips, you might be wondering what’s different about this	**VISUAL / SHOT DIRECTION** Authenticated customer reactions, fit demonstration, continuous product use, official return terms. **ON-SCREEN TEXT**

one.” “The difference is in the design.” “Instead of relying on a flexible strip across your nose, the reusable magnetic band connects to two adhesive tabs, creating outward support.” “And you don’t have to guess which size is right for you.” “The starter kit includes multiple sizes so you can find the most comfortable fit.” “But here’s what I really like.” “The best way to evaluate it is to see how it fits, how it feels, and whether you notice a difference in your own nasal breathing.” “And with a 90-day return policy, you have time to try it for yourself instead of making a decision based on a 30-second advertisement.” “So you don’t have to just take my word for it.” “Look at the verified customer experiences.” “Watch the actual product demonstration.” “And most importantly, see how it feels for you.” “Because when it comes to something as personal as breathing, your own experience matters.”	TRY IT FOR YOURSELF · 90-DAY RETURN POLICY. **PRODUCTION / PROOF NOTES** Insert two authenticated testimonials and official policy terms. Never imply a no-conditions or cost-free return.

07 — OFFER | 3:40–4:15

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“So here’s what you get with the [BRAND NAME] Starter Kit.” “Four reusable magnetic bands in different sizes, so you can find your fit.” “Fifteen sets of adhesive tabs to get started.” “A simple external system designed to support your nasal breathing.” “And a 90-day return policy, giving you the opportunity to try it for yourself.” “The magnetic bands are reusable, and replacement adhesive tabs are available whenever you need more.” “Everything you need to get started comes in the kit.”	**VISUAL / SHOT DIRECTION** Kit flat lay: reveal four reusable bands, sizing, 15 adhesive-tab sets, return graphic. **ON-SCREEN TEXT** 4 REUSABLE BANDS · MULTIPLE SIZES · 15 TAB SETS · 90-DAY RETURNS. **PRODUCTION / PROOF NOTES** Insert verified price, shipping and return conditions.

08 — CTA | 4:15–4:40

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“So if breathing through your nose feels like a struggle every time you get into bed, maybe it’s time to try a different approach.” “Not another complicated bedtime routine.” “Not another thing you have to force yourself to do.” “Just a simple mechanical device designed to help support your nasal passages while you rest.” “Imagine lying down, getting comfortable, and feeling less distracted by your breathing.” “And remember, you’ve got 90 days to try it under the return policy.” “Tap below to discover [BRAND NAME]’s Magnetic Nasal Dilator Starter Kit.” “And see what a little extra nasal support could feel like for you.”	**VISUAL / SHOT DIRECTION** Creator comfortable in bed; band close-up; direct-to-camera close and product end card. **ON-SCREEN TEXT** FEEL THE DIFFERENCE IN YOUR NEXT BREATH.

VSL 2 — THE BREATHING UPGRADE YOU CAN FEEL

ANGLE Athletic training / nasal breathing comfort

AUDIENCE Runners, cyclists, gym-goers and endurance athletes

FORMAT Athlete/creator-led UGC; 9:16; Meta Reels / Feed

01 — HOOK (HOOK C) | 0:00–0:25

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“Before your next workout, I want you to try something.” “Take a breath through your nose.” “Now gently pull the sides of your nose outward.” “And breathe again.” “Notice a difference?” “If you do, there’s a reason for that.” “And this little magnetic band is designed around the same idea.”	**VISUAL / SHOT DIRECTION** 0:00–0:03 extreme close-up of magnetic click; 0:03–0:10 athlete removes band; 0:10–0:20 finger breathing test; 0:20–0:25 workout preparation. **ON-SCREEN TEXT** TRY THIS BEFORE YOUR NEXT WORKOUT. / FEEL A DIFFERENCE? **PRODUCTION / PROOF NOTES** Breathing challenge is not a diagnostic test.

02 — PROBLEM | 0:25–0:55

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“You know that feeling when you’re halfway through a run?” “Your legs feel good.” “You’ve found your rhythm.” “You’re settling into the workout.” “But as the effort builds, breathing through your nose starts to feel more restricted.” “And sometimes, that’s completely normal. When you’re training hard, breathing through your mouth is a natural response.” “But for some people, there’s another factor.” “The nose itself can create resistance.” “And if you’ve ever felt your nostrils narrowing when you inhale, you know how uncomfortable that can be.”	**VISUAL / SHOT DIRECTION** Runner halfway through workout, increases effort and notices nasal restriction. **ON-SCREEN TEXT** WHEN NASAL BREATHING FEELS RESTRICTED.

03 — AGITATION | 0:55–1:30

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“And here’s what makes it frustrating.” “You’ve spent months building your fitness.” “You’ve invested in good running shoes.” “You’ve planned your training.” “You’ve dialed in your recovery.” “But halfway through your session, you’re distracted by something you barely thought about before leaving the house.” “Your nose.” “Maybe you’ve tried regular nasal strips.” “Maybe they didn’t give you the support you wanted.” “Or maybe you’ve just accepted that uncomfortable feeling as part of training.” “But when you put so much effort into the details of your workouts, why ignore something as basic as breathing comfort?” “Especially when there’s a simple mechanical approach you might not have tried.”	**VISUAL / SHOT DIRECTION** Runner slows mid-session, touches nose, adjusts a lifting ordinary strip. Cut to shoes, smartwatch, recovery gear. **ON-SCREEN TEXT** YOU OPTIMIZE YOUR TRAINING. DON’T IGNORE YOUR COMFORT. **PRODUCTION / PROOF NOTES** Do not imply all conventional strips fail; use authentic scenario.

04 — MECHANISM | 1:30–2:05

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“Here’s what’s happening.” “Near the entrance of your nose is an area called the nasal valve.” “It’s one of the narrowest parts of your nasal airway.” “And for some people, it can narrow even further when they breathe in.” “That’s why pulling the sides of your nose outward can sometimes make breathing feel easier.” “It’s also the principle behind external nasal dilators.” “But [BRAND NAME] uses a different design from conventional nasal strips.” “Instead of one flexible strip across your nose, it uses two adhesive tabs and a reusable magnetic band.” “The band connects to the tabs and gently pulls outward, helping support the nasal valve while you’re wearing it.” “No medication.” “Nothing inserted into your nostrils.” “Just mechanical nasal support.”	**VISUAL / SHOT DIRECTION** Accurate nasal valve illustration, adhesive tabs, reusable magnetic band attachment. **ON-SCREEN TEXT** SUPPORT THE NASAL VALVE. **PRODUCTION / PROOF NOTES** No claims of increased VO_2 max, oxygen saturation, endurance or race speed.

05 — SOLUTION / PRODUCT EXPERIENCE | 2:05–2:50

DIALOGUE / VOICEOVER	VISUALS · TEXT · PRODUCTION
“Now here’s how simple it is.” “Before your workout, clean and dry the sides of your nose.” “Apply the two adhesive tabs.” “Then bring the magnetic band toward your nose.” “Click.” “That’s it.” “The band provides outward support through the tabs.” “And because nothing goes inside your nostrils, you’re not dealing with an internal nasal insert.” “The magnetic band is reusable.” “You just replace the adhesive tabs when needed.” “So whether you’re heading out for an easy run, a bike	**VISUAL / SHOT DIRECTION** Unedited athlete prep and application; first breath, jogging, running, cooldown. **ON-SCREEN TEXT** APPLY → CONNECT → BREATHE. **PRODUCTION / PROOF NOTES** Use genuine first-breath reaction.

ride, or a gym session, you can make it part of your preparation routine."

"Put it on."

"Take a breath."

"And see whether nasal breathing feels more comfortable for you."

06 — PROOF / OBJECTIONS | 2:50–3:45

DIALOGUE / VOICEOVER

"Now, I know what you're thinking."

"Okay, but does it actually make a difference?"

"And that's exactly why I wanted you to try that breathing test at the beginning."

"Because the important question isn't whether this looks impressive."

"It's whether you personally notice a difference in how your nose feels."

"And what about regular nasal strips?"

"Both approaches provide external nasal support, but they use different designs."

"If conventional strips haven't given you the experience you're looking for, this gives you another option to explore."

"Now, what about sweat?"

"That's a legitimate question."

"The brand offers sport-focused adhesive options, but how well the tabs stay attached can depend on your skin, preparation, and how much you sweat."

"So apply them properly and test the fit during normal training before relying on them for an important event."

"And here's what makes trying it easier."

"The starter kit includes multiple sizes."

"Plus, there's a 90-day return policy, subject to the brand's terms."

"That gives you time to find your fit, wear it during real workouts, and decide whether the experience is worth it."

"Don't buy it because someone on the internet says it
